Summary

Software Engineer with a Master's in Software Engineering and Rapid Application Development. Proficient in full-stack development, backend systems, and scalable architecture, with additional experience in data analysis and NLP. Skilled at turning complex requirements into clean, efficient solutions across diverse technical environments.

Professional Experience

Software Engineer, L2T International 2024 – 2026

Full-Stack Platform Development

- Designed and developed full-stack web applications using .NET Core, Laravel, and modern frontend technologies.
- Built scalable backend architectures and user-friendly interfaces.
- Improved system performance and usability through optimized design and code practices.

Backend & API Development

- Developed RESTful APIs for data processing and system communication.
- Implemented caching mechanisms using Redis to enhance performance.
- Built asynchronous processing systems using RabbitMQ.

CRM & E-commerce Integration

- Customized and extended Dolibarr CRM modules for business data management .
- Developed and integrated modules for PrestaShop and WordPress platforms .
- Automated workflows and integrated external services via APIs.

AI Text Analysis Project

- Designed a system to analyze and classify SMS data for insights
- Extracted insights for better decision-making
- Worked on multilingual data (Arabic, French, English)

Web Developer Intern, Planet-IT 2023 – 2023

Sousse, Tunisia

- Developed and maintained web applications (front-end & back-end)
- Built dynamic interfaces and improved user experience
- Debugged and resolved technical issues to enhance performance
- Participated in full development lifecycle (design -> deployment)
- Ensured system reliability and performed updates and maintenance

Education

Master's Degree - Software Engineering & Rapid Application Development (EAD), 2023 – 2025

Higher Institute of Technological Studies of Sousse (Iset Sousse) Sousse, Tunisia

Bachelor's Degree - Information Systems Development, 2020 – 2023

Higher Institute of Technological Studies of Sousse (Iset Sousse) Sousse, Tunisia

Skills

Languages — C# | Python | PHP | JavaScript | TypeScript

Frameworks — .NET Core | Laravel | FastAPI

Databases — PostgreSQL | MySQL

DevOps & Tools — Git | GitLab | CI/CD (GitLab CI) | Redis | RabbitMQ

Web Technologies — HTML | CSS | Bootstrap | Vite

Concepts — REST APIs | System Design | Caching | Asynchronous Processing | API Integration

Methodologies — SCRUM (Agile)

Outils & IDE — Git | GitHub | Gitlab | Jira | Postman | IntelliJ | VS Code | VS | Swagger

IA / Data — spaCy (NLP) | Scrapy (Web Scraping) | Hugging Face Transformers (BERT / DistilBERT models) | NLTK (text preprocessing)

Organisations

Member

- Collaborated with a team of developers to build real-world applications
- Organized and facilitated technical workshops, reaching students to bridge the gap between theory and practice.

Participant

- Developed an entrepreneurial mindset through intensive workshops on business creation and innovation.
